1) Go to www.sofort.com
2) Click Online provider
3) Login using your merchant account details

4) Click "My project/new Project"
Once you’ve created project, you should geta project ID and then save it;

5) edit your project
In Basic settings -> General settings, tick “ Testing mode” checkbox

Successful link should be
http://www.myshop.com/contents/lang/thankyou.html

where,
<myshop> is your domain
<lang> is your shop primary language, for example, de or en-us

Abort link should be
http://www.myshop.com/contents/lang/unsuccessful.html

Automatic redirection should be ticked as shown below:

6) In Extended settings   à Notifications
   Add new HTTP notification, choose http (see screen shot)
  Tick “Activated”
  Select POST radio button

Notification URL: (Callback URL)

 https://www.globecharge.com/webshop/directebanking_callback.cgi

7) In Extended settings -> Project password and input check
    * Set your project password
    * Tick Activate input check
    * Hash algorithm: select MD5

As shown in the screenshot below:

8) Now, go through the "Payment Methods Accepted" wizard again -> in your payment setting, select your Country (merchant account country), and make sure you enter the correct information for all three parameters:
  · Customer ID
  · Project ID
  · Project password

Complete the setup wizard.

  For ShopFactory Total Care users, simply click on Properties -> Payment Methods Accepted -> you will be redirected to the GlobeCharge payment setup page.

   » Check your shop by placing a testorder.
   » Once your shop is readyto go “live” – ensure that you as a merchant **untick** the “Testing Mode”checkbox.
   » Save and publish your shop so that the changes are uploaded online.
