The picture and texts that appear under the minicartbox is actually a Page HTML code. This is depending on the website theme you are using. In this example, website theme SAB-BB has the additional HTML code by default.

If you want to remove this unwanted image and text, you will need to do the following:

- At the left tree menu, click on the page that has the unwanted image and text
- At the toolbar, locate PAGE and click on its drop-down button -> select "Add HTML code" item
- Remove the code name and the code itself – this must be emptied
- Click OK. Click OK.
- Save and preview shop. These image and texts should no longer appear.
