ShopFactory

Created On: 25 Sep 2013 10:02 AM

» Open your shop in ShopFactory
» Go to Properties -> "Edit Website HTML"
» Double-click on the HTML code that you want to add to other languages
» Highlight the code in the text area and copy the code

» After copying, click OK
» Click OK again
» At the Language toolbar, click on **Translate website** button
» Scroll-down and locate HTML code form
» You will find the **Edit** button under the other languages, click on that
» And then paste the copied code in the text area
» Click OK, and click Ok again
» Click Translate website again to go back to Normal editing mode.
» Go to Settings and enable Rebuild all
» Save and preview your shop in external browser
