

4-0086-EN-Setting up PayPal Advanced payment in ShopFac...

Author:
ShopFactory

Created On: 12 Feb 2014 9:09 AM

Please follow the procedure below on how to setup **PayPal Advanced** service in your shop:

A. SETTING UP YOUR PAYPAL ADVANCED ACCOUNT

» Login to: <https://manager.paypal.com/>

» Click on "Service Settings" -> Set up,

Enter the following URLs required:

Error & cancel url: https://santu.com/ssl/paypal_advanced_cancel.cgi

PayPal Express and Bill Me Later options within PayPal Advanced interface -> these payment options can be setup separately in ShopFactory:

([How to setup PayPal Express separately in my shop?](#))

Return url: https://santu.com/ssl/paypal_advanced_return.cgi

» Method: Post

Use Silent Post: Yes

Silent post url: https://santu.com/ssl/paypal_advanced_silentpost.cgi

- » Email confirm: N
- » Service Settings -> Test setup (fraud protection) -> edit standard filters
- » Turn off all settings
- » Account administration -> transaction setting
- » Set max amount for transactions: *In our test account, I have set it to 2,000.00*

We use template C (embedded hosted checkout page). We do not show PayPal confirmation page. So this works like a Direct method – where customers do not see the payment provider as the transaction is processed in the background. After the customer clicks on "Pay Now", the buyer will be redirected to the "Thank you" page - if payment is not processed, then the customer sees the unsuccessful page.

B. Setting up PAYPAL ADVANCED in ShopFactory

- Open your shop in ShopFactory
- Click on Properties -> Payment methods Accepted

- At the providers list, tick "PayPal Advanced" -> click NEXT
- Enter your "PayPal Advanced" details

Partner:

Merchant login:

User:

Password:

- Click NEXT
- Click FINISH
- Save and preview your shop in External browser.
- Place a test order.

=====

PayPal Advanced Testing Guidelines

? While testing, use only the credit card numbers for testing. **Other numbers produce an error.**

? Expiration date must be a valid date in the future. Use the format mmyy.

? To view the credit card processor that you have selected for testing, see PayPal Manager.

Processors Other Than PayPal (For processors other than the PayPal processor, use the guidelines below.)

Credit Card Numbers for Testing

For processors other than PayPal, use the following credit card numbers for testing. **Any other card number produces a general failure.**

American Express 378282246310005

American Express 371449635398431

American Express Corporate 378734493671000

Diners Club 38520000023237

Discover 6011111111111117

Discover 6011000990139424

JCB 3530111333300000

JCB 3566002020360505

MasterCard 5555555555554444

MasterCard 5105105105105100

Visa 4111111111111111

Visa 4012888888881881

Visa 422222222222

NOTE: Even though this number has a different character count than the other test numbers, it is the correct and functional number
