How to change a detailed page style:

http://support.shopfactory.com/kayako/index.php?_m=knowledgebase&_a=viewarticle&kbarticleid=3683

Using a newer detailed page style, there are **tabs** displayed for the following:

- » Description
- » Longer description (the tab text is called as **More Details**) and
- » List of features (the tab text is called **Specifications**)

If you want to change the name of any of these tabs, for example, changing the “More Details” tab to “Review” you can do so. The tabs can be translated via **Translate Navigation Texts** under Languages menu or the language toolbar – look for the **LD_DESCRIPTION, LD_SPECIFICATIONS, LD_SEARCH_MOREDETAILS** and change the texts to whatever is the correct translation.

- Open your shop in ShopFactory
- Click on **LANGUAGES** menu -> select **Translate Navigation Texts**
- Locate the correct LD Tag (**LD_DESCRIPTION, LD_SPECIFICATIONS, LD_SEARCH_MOREDETAILS**)
- Edit the texts

- To go back to Normal mode, click on **LANGUAGES** menu -> select **Translate Navigation Texts**
- Save and preview your shop.
