I want my customers to see the total weight of an order:
- Open your shop in ShopFactory
- Click on MY ORDERS button to open the Total Care interface on your default browser
- Select *Settings* menu -> *Account Settings*
- Scroll down to the *SETTINGS* section
- Tick “*Show total weight during checkout*” checkbox

- Click **Submit** button to save the changes.
- Go back to Normal mode and then click on Properties -> Shipping charges -> click OK to update the ordertotal.html file
- Save and publish your shop again.
*** During checkout, your customers will see the Total Weight field at page 2 of checkout.

**** The order confirmation email that customers receive will also have the "Total Weight" field.
