Apart from being able to add custom html or script in your shop thru *Properties* -> *Edit website HTML*, ShopFactory also allows you to add texts and images via the **Extra website areas** tab:

- Open your shop in ShopFactory
- At the left tree menu, click on the Home page
- There is an "Extra website areas" tab on upper right hand side of your ShopFactory editor

- Select the location where you want to insert texts and/or images.
- Add the details

(Note: If you accidentally added a blank website texts/images, please refer to separate knowledgebase article,

http://support.shopfactory.com/kayako/index.php?_m=knowledgebase&_a=viewarticle&kbarticleid=4673)

I have translated my shop in other language/s:

The extra website areas can be translated via **Languages** toolbar -> **Translate Website** -> locate the **HTML Code** section -> then click on the **Edit** button for the custom html, see below screenshot:

- Now double click on the **HC#** html to open the code box,
- Enter the translation for the extra website area
- Click OK
- Click OK
- Click on the "**Translate Website**" button again to go back to Normal mode.
- Save and preview shop
- Change the language to see the translation added to the extra website area
- Publish your shop again so that the changes are uploaded online.
