Language Link add-on is included in ShopFactory Gold. If you enabled navigation of your site in multiple languages then you can translate the pages in other languages.

Scenario: I have added some information via **Properties** -> **Website Footer** that shows up on the bottom page under the product/paragraph section. *How do I translate the information in other languages?*

- Open your shop in ShopFactory
- At the Language toolbar, click on "**Translate website**" button
- Locate the **Website footer** section
- Translate the footer information on the right column, as shown in below screenshot:

- Click on the "**Translate website**" button again to go back to Normal mode.
- Save and preview your shop.
