---

ShopFactory allows you to embed custom html or js code in your website or within a page.

### **Part 1 &ndash; Generate your embed code**

This website allows you to generate the map code for free, <http://www.map-embed.com/>

Simply enter your shop name, address, dimensions of the map: 500 x 800 for example

Then click on "Generate Code"

The html code is copied into your clipboard.

### **Part 2 &ndash; Add the custom html code in your Contact page in ShopFactory**

- Open your shop in ShopFactory
- At the left tree menu, double click "Contact" page -> Add html code -> click the + button
- Type identification name: embed map location -> and paste the html code in the "enter the code" textbox -> Set location ->Ok.
- Save and preview your shop to see what it looks like.
- Publish your shop
