4-0023-EN-How do I setup my Shop to integrate with Worl...

Author:

ShopFactory

Created On: 12 Aug 2007 12:00 AM

I have a GlobeCharge Account   To setup with a GlobeCharge account, follow all the instructions in the article below   http://globechargefaq.santu.com/article-33.html   Without a GlobeCharge account
 1 . Open ShopFactory   2. Select Properties -> Payment Methods Accepted from the Menu
3. Click Next on the first Window
  4. Click on the WorldPay Radio Button and Click Next   5. Enter your Installation ID. When you applied for a merchant account with WorldPay, the Installation ID should have been sent to you once you are approved.   Test Transactions: If your account is new and still in Test mode you can perform Test transactions by using the word " TEST" in-front of your Installation ID. Info about WorldPay test Transactions at the bottom of this article
6. Click Finish

7. Save and Preview your shop.

  Information from WorldPay regarding Test Transactions

The "live" account is not enabled for transactions, so there is no risk of accidentally triggering a live transaction until you and WorldPay have agreed that you are ready to "go live.
 To test your site, you must include the testMode parameter in your Purchase Token, for example:

 Supplying one of the following testMode values:

 Test Mode
 !--
    Description
 101 - Always No, equivalent to a declined authorisation at the bank (no funds are ever transferred)

 100 - Always Yes, equivalent to a successful authorisation at the bank (no funds are ever transferred)
