To create an image link for each page instead displaying page name in Index 2, please do the steps below:

- Open your shop in ShopFactory. By default, you will be in Normal mode.
- Click the Designer menu and select "Index2 Select a Navigation Style"

-The "Select a Page Style - Index2" list will appear. Your default Navigation Style is automatically selected. Just ensure that the "Show link image at top level of menu" check box is ticked.

-Click OK.

-Click on a page within Index2 to select the page. At the toolbar on top of the SF Editor window, click the "Edit Page" and choose "SEO details" item. Then, add an image under Link Information.

NOTE: Repeat this step to other pages.

-Republish your shop.
