The default style of Options is a drop downbox, however you can change this style to a Text box, text area, check box or option button.

To change the options do the following:

- Click on the Product and Choose Edit Products then Options and Choices from the Menu

- Click on the Option, and then click on the Edit button as pictured below

- Now choose the Option type you want, Below I have chosen Option Button

- So when you preview this style will display as

- Do this for each option
