If you want to change the line spacing of the Index 2 menu items, then you can do it by editing the index 2 CSS code.

1. Open your shop folder
2. Navigate to <project_folder>Runtime -> contents -> styles.
3. Open the index2.css file
4. Locate `td.idx2{}`
5. Add the line-height code E.g. `line-height:20px;`
The style will be `td.idx2{line-height: 30px;}`
6. You also need to add the line-height code in the MouseOver style
E.g. `td.idx2MouseOver {text-decoration: none; line-height: 30px;}`
7. Save the index2.css file (File =>SAVE)
8. Close the file.
9. Open shop in ShopFactory
10. Preview with external browser.
