1. From the menu choose **Properties** => **Shop wide Discounts**   2. After you have setup your discounts, tick the box "**Use time limit**" as shown in the screenshot below.
   3. It will enable the Set Time Limit button, so click on that.   4. Now you will see the time limit discount window:
   - Set the Start and End dates properly
 - You have the option to enable "Repeat after" a number of days, weeks or months.   So for example you can repeat the discount every 6 months   You also have an option of How often. For example I want this to repeat every 6 months 2 times only then i would set it up like this
