PayPal Plus for Germany is now supported in ShopFactory.

1. Setup PayPal Plus merchant account

To get a PayPal Plus merchant account, you need to sign in to PayPal developer account.

- Log in at https://developer.paypal.com/
- Go to *DASHBOARD* -> **My Apps**
- Click on the "Create App" button if you don’t have one yet to be able to get the credential pair: **Client ID** and **Secret**

Once the app has been created, click on the specific App name to view your **Client ID** and **Secret** details –

Basically, your account must be tested on Sandbox first. Once it’s all ok – you can switch to live (just change to **live** credential pair in My Apps page).

***You may need to copy the Client ID and Secret details for the live environment and paste the details into your shop's payment setup dialog for PayPal Plus.*

2. Enable 'PayPal Plus' in your shop

- Open your shop in ShopFactory
- Click on Properties -> Payment methods accepted
- Tick "PayPal Plus"
- Click Next
- Enter your PayPal Plus merchant account details as requested:

  » Client ID
  » Secret
  » Tick Sandbox if account is still in Test mode
  » Set currency you accept
  » Tick 'PayPal Plus' under payment method

- Click Next
- Click Finish
- Save and publish your shop.
