Adding your own payment method in Shopfactory is easy to do, just follow these steps 1. Click on Properties => Payment Methods Accepted 2. On the first screen click on the Next button. 3. The next part varies depending on the payment method chosen but the process is the same. In this example I will choose Free Order Processing by ShopFactory. 4. Follow the wizard until you arrive at the page that shows different payment types

5. In either case click on "I would like to define my own payment methods" and click Next 6. Then you will get the wizard to help you add a new method 7. Now follow the wizard to add you new method. When it has been defined and added it will appear in the Available list. You then need to click on >> to add it to the Selected list to make it available as an accepted payment type in your shop
