Login to your Globecharge Account and follow the next steps:

- 1 Login to www.globecharge.com with your account details (you received these in an email)
2. Set up your email address to accept orders in GlobeCharge - Select from menu Settings => Account Settings - make sure Email (for Orders) is correct, as well as other information and click the Submit button to save to database
3. Register your Shop
 - a) Select 'Settings' > Register Shop Details from the Menu
 - b) Enter the url of your online shop and click Submit
4. Setup your Payment Methods in GlobeCharge
 - a) Select the menu Settings => Payment Methods Accepted
 - b) Select Yes for automatic payment processor (this will be Worldpay) and Click Next
 - c) Select World Pay from the list (Click the box on the right hand side) & Click Next (you can select multiple gateways here if you wish), then Click Next
 - d) Make sure you select the currency that matches ShopFactory, once set it cannot be changed in GlobeCharge (this is usually the default currency for your country) and then click Next
 - e) Under Payment Settings (Page 5) you will now need to enter your Worldpay Details

NOTE: If you have a new account, you must perform test transactions. To do this you enter TEST in-front of your Installation ID. When ready notify WorldPay and when they set your account to "LIVE" you must remove TEST in-front of your Installation ID. TEST takes you to the WorldPay TEST SERVER.

f) Click Next to accept card types. g) The next screen confirms the card types, Currencies accepted, if all is ok, click the Finish button to save.

h) Now you need to setup ShopFactory to use your GlobeCharge account. See instructions provided in the FAQ article below:
